CD/DVD PRINTERS CALL FOR DISCOUNTS

Rimage Printers - THERMAL (warranty 1 / Prism Series 6 months)

EVEREST 600

Two-step printing process. First, a reserve image is printed on the backside of the transfer sheet. Then, the completed image is permanently adhered to the surface of specially coated optical media. The whole process takes about one minute. A variety of unique benefits that's only available on the Everest 600.

FEATURES:

600 dpi Print Resolution: The highest print resolution in the industry delivers photo quality images, with sharpness and detail that are not available in other print technologies.

Permanent Images: The retransfer print technology results in printed images that are scratch proof, water proof, fade resistant, UV protected, and will look good and last the life of the disc.

Edge-to-Edge Printing: Using specially coated media, the Everest 600 is able to print from the outer edge to the inner hub, taking full advantage of the media surface.

Predictable Yield: Ribbons have fixed yields which result in predictable cost per print and predictable print outputs. Rimage systems keep track of the remaining print yield and communicate the results to operate throughout the printing process.

Cost per Disc: Predictable print yields also result in consistent cost per printed disc.

- **Print Speeds** - CMY: 60 seconds per disc
  Black: 38 seconds per disc
- **Weight - 41 lbs**
- **Supported Platforms** - Windows 2000/XP, Mac OS X

CAT. NO. 4000332- List: $6,995.00 ***CALL FOR DISCOUNT***

EVEREST III

The Everest III utilizes Rimage's patented retransfer printing process. The final effect is amazing-a colorful, high resolution, disc with your choices of photos, graphics, text, bar codes, you name it-in less than 57 seconds.

FEATURES:

- Includes serialization, bar codes, and data merging capabilities. Works well with other industry -standard graphics and design software.
- The pigmented ink on the Everest III ribbons is UV protected, ensuring vibrant colors throughout the life of a disc. Because the ink is not water based, you will never see a smeared Everest III disc and never scratch off.
- Employs an innovative varible dot-technology. Everest III prints labels at 173 LPI color or monochrome, that is better than silk screen.
- Full color printing for photo-realistic images, monocolor printing for special effects or economy.

- **Print Speeds -**
  3 color CMY (normal mode): 60 seconds per disc
  3 color CMY (best mode): 72 seconds per disc
  Black (best mode): 35 seconds per disc

CD/DVD DUPLICATORS PERFECT COMBINATION WITH AN AUTO PRINTER

Where maximum through-put is desired for longer CD/DVD/Blu-ray programs, a CD/DVD disc duplicator is a perfect addition. This is your best production solution when hands-free duplication printing is not necessary or required.

See page 2 for details.

PRODUCER III SERIES-Hands Free Rimage PUBLISHERS

Rimage™ Producer III systems are built for the long run. Industrial-grade robotics, innovative printing solutions, and professional recording technologies are integrated into an advanced publishing system. Nothing on the market today meets the performance, versatility, or reliability of a Producer III system.

CD/DVD PRODUCER III	NUMBER OF RECORDERS	/ PRINTERS	PRINTER OPTIONS EVEREST 600	PRISM PLUS

(Blu-ray recorders available at additional cost of $500.00 per recorder)

PRINTER OPTIONS:

EVEREST COLOR PRINTING

The Rimage Everest printer is a state of-the-art printer that delivers the most durable discs and the highest print resolution in the industry. Discs printed on the Everest printer cannot be scratched and will not peel or fade, even in the most demanding environments. Printed images are permanently bonded directly to the surface of the disc. No other print technology matches the print resolution, print speed, or durability of an Everest printer.

PRISMPLUS! PRINTING

The Rimage PrismPlus! monochrome printer provides the lowest cost per printed disc and highest throughput available on the market today. Whether printing black or a spot color, the PrismPlus! print speed is unmatched by any other thermal printer. PrismPlus! is also the most cost effective printer on the market, with cost per disc as low as five cents per disc.

PRODUCER III STANDARD FEATURES:

- Front swappable recorders configured for CD/DVD and/or Blu-Ray Disc™.
- Media Input/Output: Rotating, four bin carousel holds up to 300 discs configured for input or output.
- All systems support Everest 600, Everest III, and PrismPlus! printers.
- Embedded control centers (computer) included on 8100N, 7100N, and 6100N.
- Blu-Ray Disc recording available on 8100N, 7100N, and 6100N.

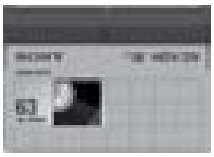
Videographer Grade 63 Min HDV Tape



Lower Dropouts
VG has 75% fewer dropouts than Competitor A. That means less errors resulting in improved tape stability and picture quality.

Less Errors
VG has 40% less errors than Competitor A due to Sony's single layer AME-II tape technology which provides a cleaner signal during playback.

Enhanced Durability
VG lasts 120 times longer than Competitor A in static still mode before signal level drops below 3dB.

Media that makes HD happen.

With over 55 years in recording media, and over 20 years in HD formats, no company has done more than Sony to make HD a reality. Whether you shoot tape, optical, hard disk or flash, the choice for HD is Sony. The #1 Brand of Professional Media.

Sony Blu-Ray (BD-R)

FOR BLU-RAY DISC RECORDERS

- Offers enormous data storage capacity for HD video recording and massive hard disc backups and large multi-media files
- 25GB or 50GB storage capacity, each disc can hold more than 5 or 10 standard DVD's
- High data transfer rate of 72Mbps
- Exceptional performance of AccuCORE technology
- Hard coating protects against scratches and prevents dust and stains
- Archival Reliability
- Stable Writing
- Temperature Durability

Optical Disks

Sony's new Professional Disc recording media is a 5 inch (12cm) rewritable optical disc capable of recording in single, sided (23GB) or two layers (50GB). By achieving a track pitch of 0.32im, with state-of-the-art manufacturing technology and by utilizing blue-laser technology, the disc media can attain high density recording more than 5 times (23GB) or 10 times (50GB) than that of a DVD (4.7GB) using red-laser technology.

23GB PRO DISC FOR XDCAM, 2.3X SPEED

High Transfer Rate: 72 Mbps on a single head unit, 144 Mbps on a dual head deck • Cat. No. PFD23A

50GB DUAL LAYER REWRITABLE OPTICAL DISC

The dual layer media will record approximately 185 min. (85 min. in the single layer disc) of SD content in DVCAM mode at 25 Mbps and 265 min. (122 min. in the single layer disc) of HD content in MPEG mode at 18 Mbps • Cat. No. PFD50DLA

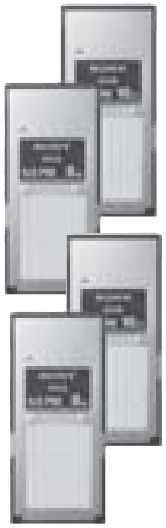
OPTICAL DISCS OFFER...

- Flexible Platform
- Large-Capacity
- Quick Random Direct Access
- Flexible Metadata Recording
- Highly Reliable and durable for high performance under tough environmental conditions and extreme temperature. Durable and Re-usable Media
- Outstanding Picture Quality of MPEG IMX/DVCAM Format Recording

SxS Memory Card



The SxS PRO Memory Card is about half the size of a PC card and fits in ExpressCard 34 and 54 slot sizes. It is available in 8GB, 16 GB and 32GB storage capacity, with higher capacity planned for the future. Providing reliability, durability and expansion flexibility while offering improved performance, the SxS PRO Memory Card may be defined as the flash media of choice – and the definitive media for high definition.

TERMS AND CONDITIONS

CHARGE: Upon approved credit in advance of order. Please send us (Attention Credit Manager) the completed Credit Application. Shipping charges will be added to all open account orders. For Purchase Orders, freight will be added. **CREDIT CARD:** Use your DiscoverCard, MasterCard, American Express or Visa; Shipping charges will be added. No minimum purchase amount required to use credit card. **C.O.D.:** We can ship immediately, there will be a C.O.D. fee added to the total order plus freight charges.

SPECIAL HANDLING: Freight charges must be prepaid for shipments outside the continental U.S.A. Shipments can be made provided insurance and freight regulations allow. C.O.D. orders shipped by air must have credit card payment for air charges prior to shipment.

MINIMUM ORDER: None.

RETURNS: Please call us for a **RETURN AUTHORIZATION NUMBER** prior to returning any merchandise. No returns accepted without return authorization. Mark number clearly on the package return label. Returns subject to 15% restocking fee. Returned items must be "like new" and be made in original cartons, secured, insured and complete with all inner packing and manuals. Package markings will be considered to make item in "not new" condition.

RETURNED CHECKS: $30.00 handling charge.

TITLE TO MERCHANDISE: Title and risk of loss of all merchandise passes to buyer immediately upon CAM's delivery to carrier. All claims for loss/damage in transit must be filed by buyer with delivery carrier.

REFUSED C.O.D. or AIR SHIPMENT ORDERS: The customer is responsible for the freight paid to the carrier (BOTH WAYS).

EQUIPMENT WARRANTY: Any equipment purchased from CAM is covered by the manufacturer's WARRANTY. Please consult warranty information enclosed with the merchandise for proper warranty procedures.
